

Electric Blade Coffee Grinder

This compact electric grinder quickly processes coffee beans and spices. It features a transparent lid to monitor the grinding progress and push-button controls for ease of use.

Overview

Compact Electric Grinding Solution

This electric blade coffee grinder is designed for efficiency and ease of use in any kitchen environment. Featuring a removable stainless steel bowl and durable dual blades, it provides consistent results for coffee beans and dry spices. The unit prioritizes user safety with a locking lid mechanism and a rebound switch for controlled, pulse-style operation.

Design & Construction

Material Highlights

Stainless Steel Bowl • Stainless Steel Blade • Matte Plastic Housing

Design Features

- Transparent lid with aroma-sealing silicon ring
- Built-in power cord storage
- Non-slip feet for stability

Operation & Safety

Safety Mechanisms

- Safety circuit: operation only possible when lid is locked
- Rebound switch: operation requires continuous button pressure

Blade Configuration

2 blades
