

Electric Boat Trailer Winch 2000lb Capacity

This electric winch has a 2000 lb capacity and is designed for boat and trailer applications. It features a remote control, hook with safety latch, and a manual crank handle for emergency use.

Overview

Portable 12V Electric Winch

This 12V DC powered electric winch is a convenient and portable solution for pulling boats, stuck vehicles, and other heavy equipment. Designed with a built-in carrying handle and a quick-attach mounting plate, it allows for easy setup and transport without the need for extension cords or gas engines. The unit includes essential safety features like an emergency crank handle and an adjustable clutch, making it a reliable tool for marine and roadside recovery tasks.
