

# Electric Cable Hoist

This electric cable hoist is designed for lifting applications in workshops and construction sites. It features overload protection and a limit switch to prevent over-winding.

## ADDITIONAL IMAGES

## Product Overview

### Professional Electric Cable Hoist

This high-performance electric cable hoist is engineered for reliability and safety in demanding lifting environments such as workshops, garages, and industrial assembly lines. Featuring a 100% copper wire motor with thermal protection and a high-grade braking system, it ensures consistent operation and long service life. The unit is built with safety as a priority, incorporating upper and lower limit switches, an emergency stop function, and durable anti-twist aircraft wire rope.

## Technical Performance

### Key Performance Metrics

<b>500 kg</b> Max Lifting Capacity	<b>12 m</b> Lifting Height	<b>900 W</b> Input Power	<b>8 m/min</b> Lifting Speed
---------------------------------------	-------------------------------	-----------------------------	---------------------------------

### Lifting Specifications

Configuration	Capacity	Height	Speed
Single Hook	250 kg	12 m	8 m/min
Pulley Hook	500 kg	6 m	4 m/min

## Motor & Electrical

### Electrical Requirements

- Rated Voltage: 220/230V
- Frequency: 50Hz
- Power: 900W
- Overheat protection included

## Safety & Compliance

### Safety Features

IP54 Rated • Upper/Lower Limit Function • Emergency Stop Switch • Thermal Protection • Anti-Twist Wire Rope

### Standards & Approvals

CE, GS, EMC, RoHS 2.0, ETL, CETL, EN-14492-2, UL1340
