

# Electric Caravan Mover

This electric caravan mover assists in maneuvering caravans and trailers in tight spaces. Its motorized roller engages with the caravan's tires, providing controlled movement.

## ADDITIONAL IMAGES

## Overview

### Professional RV Maneuvering Solution

This electric caravan mover provides a reliable and powerful solution for maneuvering trailers and recreational vehicles in constrained spaces without requiring engine power. Designed for ease of use, the system utilizes a high-torque motor and a motorized roller to ensure smooth, precise control from a distance via remote operation. It is an ideal tool for storage facilities, campgrounds, and residential use, significantly simplifying the parking and positioning process while reducing physical strain.

## Technical Specifications

### Key Operating Features

- Motorized roller engagement
- High-torque performance
- Adjustable clamping mechanism
- Remote control operation
