

Electric Carbon Tube Heater with Tilt and Oscillation

This electric heater uses a carbon tube to generate heat. It has tip-over protection, 90-degree oscillation, and a soft-touch tilting angle.

Product Overview

Efficient Indoor Heating Solution

This electric carbon tube heater is engineered for reliable, localized indoor warmth. Featuring a robust radiant heating element protected by a durable metal safety grill, it ensures both safety and performance. The unit offers user-friendly controls for heat adjustment and includes a tilting mechanism for precise directional heat control.

Performance & Features

Heating Technology	Carbon Tube Radiant
Oscillation	Yes
Tilt Mechanism	Yes
Safety Features	Metal Safety Grill, Stable Base

Design & Build

Control Interface

- On/Off Switch
- Multiple Heat Settings

Intended Use	Indoor
