

Electric Cargo and Passenger Tricycle

This electric tricycle is designed for cargo transport and passenger use. It features a front basket, a main seating area with pedals, and a rear cargo bed with additional seating and a backrest.

Product Overview

Versatile Multi-Purpose Tricycle

This electric tricycle is engineered for both cargo transport and passenger mobility, offering a dual-functional design. Equipped with a front basket, a central pedaling area, and a rear bed with a backrest, it balances convenience with utility. It serves as an efficient solution for urban delivery services, personnel transportation, or recreational use in varied environments.
