Product Overview

Versatile Electric Cargo Solution

This electric cargo tricycle is engineered for efficient and eco-friendly logistics, offering a robust solution for urban and rural transport. Featuring an integrated beam frame and high-performance shock absorption, it ensures stability and durability for heavy-duty daily use. The vehicle is equipped with modern safety features including a dual-braking system and high-brightness LED lighting for reliable operation in diverse conditions.

Chassis and Design

Structural Build

Integral Beam Frame, Integrated Stamping Cargo Box, Matte Black Rims

Performance and Safety

Safety Features

- 130 Brake Drum (Front)
- Dustproof Handbrake System
- Rear-wheel braking assistance
- Adjustable chrome-plated rearview mirrors

Shock Absorption

135External spring hydraulic shock absorption

Electrical Systems

Illumination

6 pcs

LED Lamps

Operation

Display and Controls

Mechanical display panel with simple, clear dial interface
