

# Electric Cargo Tricycle with Canopy

This electric cargo tricycle is designed for efficient and eco-friendly transportation of goods. It features a sturdy frame, a spacious cargo bed with side rails, and a covered canopy to protect cargo.

## ADDITIONAL IMAGES

## Overview

### Efficient Urban Logistics Solution

The JG160 electric cargo tricycle is engineered for efficient, eco-friendly transportation of goods in urban environments and warehouse settings. Featuring a robust, sturdy frame and a spacious cargo bed with side rails, it is designed to handle various commercial applications reliably. The vehicle includes a weather-resistant canopy to protect cargo from the elements, ensuring consistent performance regardless of weather conditions.

## Performance & Power

Power Source	Electric Motor
Operational Benefits	Quiet Operation, Emission-Free, Cost-Effective

## Design & Build

### Key Features

- Weather-resistant canopy
- Spacious cargo bed with side rails
- Durable tires for varied terrain
- User-friendly control system
- Comfortable seating

## Safety & Compliance

### Safety Equipment

- Headlights
- Taillights
- Turn signals

## Applications

### Ideal Use Cases

Urban Deliveries • Warehouse Operations • Short-distance Travel • Commercial Logistics
