

Electric Cargo Tricycle with Enclosed Bed

This electric tricycle is designed for transportation. It features a front steering wheel and a rear cargo bed enclosed by metal railings.

Overview

Professional Electric Cargo Solution

This electric cargo tricycle is engineered for efficient short-distance transportation of goods and passengers. Featuring a durable enclosed cargo bed and a reliable electric drive system, it provides a practical solution for urban logistics or site-based transport. The operator-focused design includes essential safety features like a headlight and rearview mirrors for improved maneuverability.
