

Electric Cargo Tricycle with Flatbed

This electric tricycle is designed for cargo transport, featuring a robust frame and flatbed with railing. It is equipped with a powerful motor and has a maximum load capacity of 200kg.

Overview

Robust Electric Cargo Solution

This electric cargo tricycle is engineered for efficient and eco-friendly goods transport. Featuring a durable flatbed design with protective railing, it offers a stable and reliable platform for various logistics needs. Equipped with a comfortable operator seat, suspension system, and essential lighting, it ensures safety and ease of use in diverse operational environments.
