

Electric Cargo Tricycle with Front Basket and Rear Bed

This electric tricycle is designed for personal transportation and light cargo hauling. It features a front basket for smaller items and a rear cargo bed with metal railings for securing larger loads.

Product Overview

Versatile Electric Cargo Utility

This electric cargo tricycle is an ideal solution for efficient urban transportation and light-duty goods delivery. It features a robust frame design, a secure rear cargo bed, and a convenient front storage basket. With the inclusion of pedal-assist capabilities, it offers both motorized power and manual flexibility to suit varying commute needs.
