

Electric Cargo Tricycle with Front Basket and Rear Cargo Bed

This electric tricycle is designed for carrying plate loads and other cargo. It features a front basket, a comfortable seat with a backrest, and a rear cargo bed with safety rails.

Product Overview

Heavy-Duty Electric Cargo Solution

This electric cargo tricycle is engineered as a robust plate load carrier, designed to streamline material transport in industrial or commercial environments. It features a versatile configuration with a convenient front basket for smaller items and a spacious rear cargo bed equipped with safety rails for secure hauling. Built with a durable frame, front suspension, and reliable tires, this vehicle ensures stability and efficiency for demanding daily operations.
