

Electric Cargo Tricycle with Front Basket and Rear Cargo Bed

This electric cargo tricycle is designed for efficient and eco-friendly transportation of goods. It features a front basket for smaller items and a spacious rear cargo bed with a seat and backrest for transporting larger loads or passengers.

Overview

Efficient Urban Cargo Solution

This electric cargo tricycle offers a versatile and eco-friendly solution for urban goods transportation and delivery services. Engineered with a sturdy three-wheel frame, it ensures stability and balance while carrying heavier loads. The dual-purpose design features both a front basket for smaller items and a spacious rear cargo bed, which includes a seat and backrest for flexibility in transporting goods or passengers.
