

# Electric Cargo Tricycle with Rear Cargo Bed

This electric cargo tricycle is designed for utility and transportation purposes. It features a step-through frame for easy access, a front headlight for visibility, and a large rear cargo bed with a seat and safety rails.

## Overview

### Versatile Utility Tricycle

This electric cargo tricycle is engineered for efficient utility and transportation needs. Featuring a convenient step-through frame design, it offers easy access for operators while providing a stable ride. The robust rear cargo bed is equipped with safety rails and a seat, making it highly adaptable for transporting goods or passengers across short to medium distances.
