

Electric Centrifugal Juicer with Stainless Steel Construction

This centrifugal juicer efficiently extracts juice from fruits and vegetables. It features a high-speed spinning blade that separates juice from pulp.

Product Overview

High-Efficiency Centrifugal Juicing

This electric centrifugal juicer is engineered for efficient juice extraction from a wide variety of fruits and vegetables. Featuring durable stainless steel construction, it is designed for both longevity and ease of cleaning. The unit includes a large feeding chute to accommodate whole produce, streamlining the preparation process for commercial or high-volume home use.

Technical Specifications

Material	Stainless Steel
Operation	Electric Centrifugal
Control Type	Dial Control

Features

Key Features

- Large feeding chute for whole produce
- Integrated pulp collection container
- Dedicated juice collection container
- Adjustable speed and power dial

Application	Home Use, Food Preparation
