

Electric Ceramic Slow Cooker

This electric slow cooker is designed with a transparent housing and a ceramic inner pot featuring decorative blue drawings. It is ideal for slow cooking and stewing.

Product Overview

Premium Electric Ceramic Slow Cooker

This electric stew pot is engineered for optimal nutrient retention through advanced steam-stew technology. Constructed with fine white porcelain pottery and high-strength, heat-resistant PC materials, it combines durability with elegant design. The bottom-heating technology ensures even heat distribution, making it an energy-efficient solution for professional-grade slow cooking.

Technical Specifications

Key Advantages

- Nutrient-preserving steam stew
- Energy-saving operation
- High-temperature resistance
- Uniform heating coverage

Materials	Fine White Porcelain, High-Strength PC
Heating Technology	Bottom-heating system
Firepower Settings	Multi-range adjustable
