

Electric Ceramic Stew Pot

This electric stew pot features a ceramic inner pot and transparent cover. It utilizes PTC components to evenly heat food, making it ideal for slow cooking.

Product Overview

Professional Electric Ceramic Stew Pot

This electric ceramic stew pot is designed for efficient and convenient slow cooking, perfect for professional kitchens or high-end culinary environments. It features an intuitive digital interface with preset functions, allowing for precise control over stewing processes. The appliance integrates safety and usability features such as clear water level indicators and a transparent lid for easy monitoring.
