

Electric Chain Hoist for Heavy Lifting

This electric chain hoist is designed for lifting heavy loads in industrial and construction environments. It features a high-strength alloy steel chain and a durable motor for reliable and safe operation.

Product Overview

High-Performance Electric Chain Hoist

Electric chain hoists provide a compact and durable solution for material handling across diverse industrial environments. Featuring hot-quenched internal gears for enhanced wear resistance, these units are engineered for reliability and high performance. With a versatile lifting capacity range and multiple mounting configurations, they serve as a core component for lifting operations in manufacturing, logistics, and infrastructure sectors.

Technical Specifications

Lifting Capacity

0.5 ton

Minimum Capacity

35 ton

Maximum Capacity

Working Class

M3, M4

Gear Treatment

Hot quenched for wear resistance and toughness

Configuration Options

Available Configurations

- Hook type
- Electric chain hoist with manual trolley
- Electric chain hoist with electric trolley
- Low headroom electric chain hoist

Applications

Suitable Industries

- Manufacturing & Workshops
- Warehousing & Logistics
- Metallurgy & Petrochemicals
- Ports & Railway
- Civil Aviation
- Power Stations
- Food Industry
- Paper Making
- Building Materials
