

Electric Chain Hoist for Industrial Lifting

Electric chain hoists are designed for lifting and lowering heavy loads in industrial environments. They offer robust construction, precise control, and reliable performance for various lifting needs.

Overview

Industrial Lifting Solution

These electric chain hoists are engineered for efficient lifting and lowering of heavy loads in demanding industrial environments. Built with robust materials, they ensure reliable performance and precise control during operation. The system includes a durable chain and an efficient motor, making it a versatile choice for various lifting requirements.

Key Features

Available Models

SHH Hanging Type, HHXG Series, SHK Series

Performance Metrics

Maximum Lifting Capacity

5 T

Max Load

0.5 T

Min Load

Technical Specifications

Build Quality

- Durable heavy-duty chain
- High-efficiency industrial motor
- Robust housing construction

Control System

User-friendly manual control interface
