

Electric Chain Hoist with Chain Bag

This electric chain hoist is equipped with a limit switch and forged hook for enhanced safety. Available in single and double-speed configurations, it also features an emergency stop and double reducer.

Product Overview

Professional Electric Chain Hoist

This electric chain hoist is engineered for heavy-duty lifting applications in industrial and construction environments. It features a compact, high-strength steel body design paired with a high-efficiency motor to ensure reliable operation and low power consumption. Equipped with essential safety features such as limit switches and high-tensile alloy steel hooks, this hoist provides a durable and precise solution for demanding lifting tasks.

Performance & Technical

Lifting Capacity Range

1 t Minimum Capacity	5 t Maximum Capacity
--------------------------------	--------------------------------

Speed Configuration: Two Speed

Headroom Design: Low Headroom

Construction & Safety

Safety Features: Limit Switches, High Tensile Alloy Hooks, Double Reduction

Chain Specifications: Carburized chain material

Body Construction: Pressed steel structure

Accessories

Included Accessories

- Chain Bag (High-strength plastic)
- Pendant Control
