

Electric Chainsaw Sharpener

This portable electric chainsaw sharpener is designed for efficient and precise chain saw sharpening. It features a robust grinding mechanism for restoring sharpness to saw chains.

Overview

Professional Saw Blade Maintenance

This electric sharpener is designed for high-precision maintenance of saw blades, featuring a robust induction motor for quiet, long-lasting operation. The specialized 'Z' shape rocker arm and 'U' shape cross-section provide enhanced rigidity and ease of adjustment for various blade specifications. With a stepped positioning block, it ensures accurate and reliable grinding results for professional-grade performance.

Technical Specifications

Power Performance

230 V

Voltage

160 W

Power

3000 rpm

No Load Speed

Operational Adjustments

+/- 15°

Disc Size

∅20x ∅100x 1.0 mm

Compatibility

Compatible Blade Diameters

Supported Diameters (mm)

∅89

∅190

∅305

Features

Key Features

- Induction motor for low noise and extended service life
- Z-shaped rocker arm for flexible positioning
- U-shaped cross-section for increased structural rigidity
- Stepped blade positioning block for improved accuracy
- O-shaped support surface for stable positioning
