

Electric Citrus Juice Extractor

This electric citrus juicer is a compact appliance designed for extracting juice from citrus fruits. Its integrated pulp filter ensures smoother juice, making it ideal for preparing fresh and healthy beverages.

Product Overview

Efficient Citrus Juicing

The Electric Citrus Juice Extractor is a compact and efficient kitchen appliance designed for effortless extraction of fresh juice from citrus fruits. Featuring a durable construction with a transparent 0.5L container and a white juicing cone, it offers ease of use and simple cleaning. Its 25W motor and two-direction rotation ensure maximum yield, while the integrated pulp filter separates seeds and pulp for a smoother beverage.
