

Electric Citrus Juice Extractor with Spout

This electric citrus juicer efficiently extracts juice from various citrus fruits. It features a clear plastic container with a convenient spout and handle for easy pouring.

Product Overview

Efficient Citrus Extraction

The J-1601 Electric Citrus Juice Extractor is a versatile and efficient solution for daily juicing needs. Featuring a 600ml detachable container and an adjustable pulp control filter, it allows users to customize their juice consistency with ease. Its two-direction rotation and anti-drip spout ensure maximum juice yield and a clean pouring process, making it an essential appliance for any kitchen or commercial setting.
