

Electric Citrus Juicer with Rotating Reamer

The electric citrus juicer is designed for extracting juice from various citrus fruits, including oranges, lemons, limes, and grapefruits. It utilizes a rotating reamer to efficiently separate the juice from the pulp and seeds.

Product Overview

Efficient Citrus Juicing

This electric citrus juicer is designed for high-efficiency extraction from a variety of citrus fruits including oranges, lemons, limes, and grapefruits. It features a specialized rotating reamer that effectively separates juice from pulp and seeds, ensuring a smooth result. With its integrated collection container and built-in filter, it provides a quick, clean, and convenient solution for fresh juice production.
