Product Overview

High-Efficiency Commercial Citrus Juicer

This durable stainless steel citrus juicer is engineered for high-volume juice extraction, capable of processing up to 5.0L per batch. Featuring a powerful 180W DC motor, it offers continuous operation and high efficiency for demanding environments. The stainless steel filter ensures perfect separation of juice and pulp, while the robust build quality guarantees a long service life.

Technical Specifications

Power Output	180 W
Juice Capacity	5 L
Motor Type	DC

Features & Construction

Operational Features

- Continuous working mode
- High-torque motor
- Pulp control system
- Drip-free spout
- Non-slip feet

Performance Highlights

180 W Motor Power	5 L Batch Capacity
