

Electric City Passenger Bus

This electric city passenger bus is designed for public transportation. It features a sleek, aerodynamic design and large windows.

Overview

Modern Electric Urban Mobility

This electric passenger bus is engineered for high-efficiency urban transit, combining a sleek aerodynamic exterior with a focus on passenger comfort. Featuring large panoramic windows for an enhanced viewing experience and a modern electric powertrain, it provides a sustainable solution for city transportation. Its design prioritizes safety, operational efficiency, and a comfortable ride for daily commuters.
