

# Electric Coffee Bean Grinder with Stainless Steel Bowl

This electric coffee grinder is designed for efficient and consistent grinding of coffee beans. It features a durable stainless steel grinding bowl and a transparent lid for monitoring the grinding process.

## Overview

### Efficient Coffee Grinding Solution

This electric coffee bean grinder is engineered for consistent and efficient daily performance. Featuring a durable stainless steel grinding bowl and a transparent lid for easy monitoring, it ensures optimal results for every brew. Designed for reliability, this appliance is an essential addition for any environment requiring freshly ground coffee.

## Technical Specifications

Power Rating	180 W
Voltage Input	220-240V
Frequency	50/60Hz

## Design & Build

**Bowl Material**  
Stainless Steel

**Lid Design**      Transparent for process monitoring

## Usage

**Ideal Application**      Home Use, Coffee Preparation

## Key Performance Metrics

### Core Specifications

**180 W**

Power

**240 V**

Max Voltage
