

Electric Coffee Grinder with Stainless Steel Blade

This electric coffee grinder features a stainless steel blade for efficient grinding. It has a 60g capacity and includes a safety lock system and pulse operating mode.

Overview

Professional Grinding Solution

This electric coffee grinder features a durable stainless steel housing and high-performance blade, designed for consistent results in a professional kitchen environment. It offers a 60g capacity, making it perfect for smaller, frequent batches of freshly ground coffee, nuts, or spices. With a safety lock system and user-friendly pulse operation, it balances high efficiency with necessary operational safety.
