

Electric Commuter Bicycle with 48V Battery

This electric bicycle has a 48V 20AH battery, allowing for a long travel range of 85 kilometers. It features a thematic saddle and a patented scraper system.

Product Overview

Commuter Electric Bicycle

This electric commuter bicycle is designed for efficiency and comfort, featuring a powerful 48V/20AH battery system for extended range. It incorporates a robust alloy wheel motor and a dual suspension system for a smooth ride on various urban surfaces. With thoughtful additions like auxiliary side lights and a comfortable ergonomic saddle, it provides a reliable and safe transportation solution for daily commuting.
