

# Electric Commuter Bike with Step-Through Frame

This electric bike is designed with a step-through frame for easy access. It includes a suspension fork, headlight, and rear rack for comfortable urban transportation.

## Product Overview

### Urban Commuter Design

This electric commuter bike is engineered for efficient urban travel and recreational riding. Featuring a convenient step-through frame, it offers easy mounting and dismounting for riders of all levels. The bike combines a sporty aesthetic with practical utility, including a rear luggage rack and integrated safety features like a front headlight and rearview mirrors for city navigation.
