

Electric Commuter Bike

This electric bike offers a smooth and efficient riding experience. It is equipped with lights for enhanced visibility and a durable frame for stability.

Overview

High-Performance Electric Commuter

This electric commuter bike is engineered for efficiency and reliability in urban environments. It features a powerful 1500W motor capable of reaching speeds up to 60km/h, making it ideal for daily travel. With a versatile battery system supporting both lead-acid and lithium-ion options, it offers a maximum range of up to 110km on a single charge.

Performance Metrics

Motor Power	1500 W
Maximum Speed	60 km/h
Climbing Capacity	20 deg

Battery & Charging

Battery Configuration

12 V Voltage per unit	40 Ah Capacity
---------------------------------	--------------------------

Compatible Battery Types	Lead-acid, LFP, Li-ion
Charging Time	e50 e8 hours

Technical Specifications

Speed Modes

- 25
- 45
- 60

Weight Specifications

Metric	Value 1	Value 2
Gross Weight	156 kg	116 kg
Net Weight	136 kg	96 kg

Tire Dimensions	130/60-13
