Overview

Urban Commuting Solution

This electric motorcycle is designed specifically for modern urban environments, combining aerodynamic styling with efficient performance. It features a high-torque center motor and a reliable battery system, making it an ideal choice for daily commuting and short trips. With smart connectivity options and robust safety features like hydraulic disc brakes, it offers a sustainable, comfortable, and convenient transportation alternative for city dwellers.

Performance

Maximum Torque

30 N.m

Nominal

120 N.m

Peak

Motor Power	2500 W
Maximum Speed	70 km/h
Maximum Range	90 km

Battery & Power

Battery Type	Lead acid
Battery Capacity	60V 32Ah

Dimensions & Build

Dimensions (L*W*H)	1850 x 730 x 1100 mm
--------------------	----------------------

Features

Safety Equipment

- Hydraulic disc brakes
- Regenerative braking
- LED lighting system
- Digital display

Smart Features

APP Connectivity, Keyless Start, Remote Monitoring
