

# Electric Concrete Mixer

This electric mixer is designed for mixing viscous materials such as concrete, mortar, and adhesives. It features a high-torque motor and variable speed control for efficient and adaptable mixing.

## Product Overview

### Professional Mixing Solution

This electric mixer is a robust power tool specifically engineered for handling viscous materials like concrete, mortar, plaster, paint, and adhesives. It features a high-torque motor paired with variable speed control to ensure consistent performance across various material types. With its ergonomic dual-handle design, this tool provides enhanced control, stability, and reduced user fatigue during demanding job site operations.

## Physical Specifications

Weight (Metric)	3.95 kgs
Weight (Imperial)	8.69 lbs

## Technical Capabilities

Key Features	High-Torque Motor, Variable Speed Control, Ergonomic Dual Handle, Durable Paddle
--------------	--

## Applications

### Suitable Materials

- Concrete
- Mortar
- Plaster
- Paint
- Adhesives
