

Electric Convection Space Heater with LED Display

This electric convection space heater features an accessible LED display for selecting temperatures from 5 to 30 . It also includes a 24-hour timer for automated operation.

Product Overview

Efficient Convection Heating

This electric convection space heater offers silent, rapid, and even airflow transfer, making it an ideal heating solution for various indoor environments. Engineered with a durable X-shaped aluminum heating element, it ensures efficient heat distribution while prioritizing safety with overheat and overturn protection. Its versatile design allows for flexible installation, supporting both wall-mounted and free-standing setups.

Technical Specifications

Heating Element	X-shaped aluminum heating element
Power Cord Length	1.5 M
Plug Type	VDE

Safety & Compliance

Safety Features

- Over-heat safety protection
- Overturn safety protection (optional)
- Water splash proof (IP24)

Certifications & Approvals

GS, CB, CE, EMC, EMF, IP24, RoHS, PSE, SAA

Installation & Usability

Mounting Options

- Wall mounted (included)
- Free standing with castors (optional)

Optional Accessories

- Handle for easy moving
- Ionizer / Cold Plasma Ionizer
- Towel dryer
