

Electric Conveyor Belt Cutter

This electric cutter is designed for conveyor belt maintenance. Its adjustable cutting depth and durable construction make it suitable for industrial applications.

Overview

Precision Cutting for Industrial Applications

This electric conveyor belt cutting machine is engineered for the precise and efficient processing of rubber and plastic materials. Designed for industrial environments, it features variable speed control and adjustable cutting depth to accommodate various belt thicknesses. With integrated safety mechanisms and a robust construction, it provides a reliable solution for accurate, repeatable cuts in manufacturing and maintenance settings.

Technical Specifications

Operating Voltage	220 V
Model Designation	DAC-L
Cutting Capabilities	Rubber, Plastic, Conveyor Belts

Performance Features

Key Performance Features

- Variable speed control
- Adjustable cutting depth
- Laser guidance system
- Durable industrial-grade motor

Safety & Design

Safety Features

Blade Guards • Ergonomic Handles • Operator Protection System

Portability	Yes
Storage	Rugged carrying case included for on-site maintenance
