

Electric Deep Fryer with Temperature Control

This electric deep fryer is a compact appliance designed for deep frying foods. It includes a temperature control knob, a removable frying basket, and a non-stick interior.

Product Overview

Professional Electric Deep Fryer

This high-performance electric deep fryer is designed for commercial and professional kitchen efficiency. Featuring a robust stainless steel shell and an immersion-type stainless steel heating tube, it ensures rapid and even heat distribution. With precise temperature control and an integrated electronic timer, it provides consistent results for a variety of frying applications.

Technical Specifications

Power Rating

1500 W
Power

Oil Capacity

3.5 L

Design & Build

Key Design Features

- Divided body with viewing window
- Detachable heating pipe for easy cleaning
- Frying basket with folding handle

Construction Materials

Stainless Steel Shell, Immersion Heating Tube

Operation & Safety

Operational Controls

- Adjustable temperature control
- Electronic timer with LED indicator
- Power and temperature status indicator lights

Safety Features

Self-protection heating element • Safety lock
