

Electric Demolition Breaker

This electric breaker is a powerful tool designed for demolition and breaking tasks. It features a robust motor for high impact energy, ensuring efficient performance in concrete, masonry, and other hard materials.

Overview

High-Performance Demolition Power

This electric demolition breaker, model 401 Z1G-NG-401, is engineered for heavy-duty breaking and demolition tasks in concrete and masonry. It features a robust motor designed to deliver high impact energy, ensuring efficient material removal on demanding job sites. With an ergonomic design focused on user comfort, it includes vibration reduction technology to minimize fatigue during extended professional use.

Technical Specifications

Model Number	401 Z1G-NG-401
Suitable Applications	Construction, Renovation, Demolition, Masonry, Concrete Breaking

Key Features

Key Features

- High impact energy motor
- Durable bit retention chuck
- Vibration reduction technology
- Ergonomic grip design
- Rugged construction for job site durability
