

Electric Demolition Hammer

This heavy-duty electric demolition hammer is designed for breaking concrete and demolition work. It features a powerful motor and robust construction for demanding job site applications.

Product Overview

Heavy-Duty Demolition Performance

This electric demolition hammer is engineered for rigorous job site applications, including concrete breaking, chipping, and heavy-duty demolition work. Built with a powerful motor and robust construction, it ensures reliability and high performance under demanding conditions. The ergonomic handle design enhances user comfort and control, making it an ideal tool for professional contractors and construction crews.
