Product Overview

Professional Electric Demolition Hammer

This versatile electric demolition hammer is engineered for high-performance drilling and demolition tasks across concrete, stone, and brick surfaces. Featuring a streamlined, ergonomic design with shock-proof rubber handles, it significantly reduces operator fatigue during extended use. The tool incorporates advanced safety and efficiency features, including a reliable clutch system and high-grade alloy steel components, ensuring durability and consistent power for demanding construction environments.

Performance & Features

Key Technical Advantages

- High-power motor for efficient drilling rates
- Brush frame reversing (positive/negative rotation) to control sparks and extend lifespan
- Speed control switch for precise operation
- Reliable clutch device for user safety
- High-temperature enameled wire motor construction

Operational Modes

Hammer, Drill, Hammer Drill, Angle Adjustment

Build Quality

Construction Materials

- High-temperature enameled wire (motor)
- High-performance alloy steel (gears and cylinder)
- Shock-proof soft rubber handle
