

Electric Demolition Hammer with Vibration Reduction

This electric demolition hammer is designed for heavy-duty demolition work. It features a robust motor and durable construction to withstand demanding job site conditions.

Product Overview

High-Performance Demolition Power

This electric demolition hammer is engineered for heavy-duty demolition tasks, featuring a robust motor and durable construction designed to withstand demanding job site conditions. It incorporates an advanced vibration reduction system to enhance user comfort and minimize fatigue during extended use. With an ergonomic design offering multiple handle positions and a quick-change chuck, this tool provides the control and efficiency required for breaking concrete, asphalt, and other hard materials.

Key Features

Key Capabilities

Vibration Reduction, Quick-Change Chuck, Ergonomic Design, Heavy-Duty Motor

Operational Details

Ideal Applications

- Concrete demolition
- Asphalt breaking
- Hard material removal

User Comfort & Control

1 Included

Vibration Reduction System

2 Multiple

Adjustable Handle Positions
