Overview

Heavy-Duty Demolition Performance

This electric demolition jack hammer is engineered for demanding construction and renovation tasks, including breaking concrete, asphalt, and masonry. Featuring a robust 2600W motor, it delivers the high impact force required for professional-grade chiseling, excavation, and slotting. Designed for durability and efficiency, this tool is an essential asset for pipe laying, mechanical installation, and large-scale infrastructure projects.

Technical Specifications

Power Consumption	2600 W
Voltage/Frequency	230V~50Hz
Maximum Impact Force	2000 N
Model Number	65890-E2

Compliance & Certification

Certifications	CE
Country of Origin	China

Applications

Primary Applications

- Pipe laying
- Mechanical installation
- Water supply and drainage construction
- Interior decoration
- Port facility construction
- Concrete breaking
- Masonry structure demolition
- Asphalt pavement breaking

Compatible Accessories

- Chisels
- Shovels
- Pick brazing tools
