

Electric Demolition Jack Hammer

The Heavy Duty Electric Demolition Jack Hammer is a powerful and robust tool designed for demanding demolition tasks. Featuring a high-impact mechanism, it delivers exceptional breaking power for concrete, masonry, and asphalt.

Product Overview

Heavy-Duty Performance

The Electric Demolition Jack Hammer is a robust tool engineered for demanding demolition tasks. It features a high-impact mechanism designed to deliver exceptional breaking power on concrete, masonry, and asphalt surfaces. Built for professional contractors, its rugged construction ensures longevity, while integrated vibration dampening technology enhances user comfort during prolonged heavy-duty applications.

Technical Specifications

Key Features

- High-impact demolition mechanism
- Vibration dampening technology
- Durable chuck for secure bit retention
- Ergonomic design for reduced fatigue

Applications	Concrete Breaking, Masonry, Asphalt Removal
Model Identifier	GKF
