

Electric Demolition Jackhammer

This electric demolition jackhammer features a robust motor for heavy-duty concrete breaking and demolition work. Its design incorporates a vibration-dampening system, durable chuck, and ergonomic features for enhanced control and maneuverability.

Overview

Professional Demolition Performance

This electric demolition jackhammer is engineered for high-intensity tasks, featuring a 1600W high-power motor that delivers strong impact force for efficient concrete breaking and demolition. Designed with professional-grade bearings and specialized lubrication, the machine ensures a longer service life and reliable operation. Its ergonomic design includes a fast-loading chuck system, making bit changes quick and convenient for demanding job sites.

Technical Specifications

Rated Power

1600 W

Power Output

Key Features

High Impact Force, Fast-Loading Chuck, Professional Bearings, Extended Service Life

Maintenance Design

Utilizes professional-grade grease for enhanced durability and reduced wear.
