

Electric Detail Sander with Dust Collection

This electric sander is designed for smooth and efficient material removal. It features a compact design for easy maneuverability and a powerful motor for consistent performance.

Product Overview

Professional Electric Detail Sander

This electric detail sander is engineered for precise material removal and surface finishing across wood, metal, and plastic. Featuring a compact and ergonomic design, it allows for easy maneuverability in tight spaces and corners. The integrated dust collection system ensures a cleaner work environment, while the powerful motor maintains consistent performance for demanding tasks.

Technical Specifications
