

Electric Diesel Fuel Pump Assembly

This electric diesel fuel pump ensures a long service life in diesel applications, up to 10,000 hours. It resolves cold start issues in winter and eliminates the need for manual exhaust.

Product Overview

High-Performance Fuel Delivery

The KS129Z electric diesel pump assembly is a critical component engineered specifically for excavator fuel systems. This robust unit ensures consistent and efficient fuel delivery to the engine, even under the demanding conditions of construction environments. The assembly comes fully equipped with an integrated fuel filter and electric pump, providing a complete solution for reliable machinery operation.

Technical Specifications

Included Components

- Electric fuel pump
- Fuel filter
- Electrical connections

Model Identifier	KS129Z
Primary Application	Excavator
Key Features	Fuel/Water Separation, Construction Grade, Integrated Assembly
