

# Electric Diesel Fuel Pump for Construction Machinery

This electric diesel pump is designed to provide a long service life, up to 10000 hours, in diesel applications. It solves cold start problems in winter and eliminates the need for manual exhaust.

## Product Overview

### Reliable Fuel Delivery

This electric diesel fuel pump is engineered specifically for use in heavy-duty construction machinery and excavators. It is designed to ensure consistent and reliable fuel delivery, which is critical for maintaining optimal engine performance under demanding operational conditions. The unit arrives complete with all necessary installation hardware and the required electrical connector for a seamless setup.

## Technical Details

### Power Source

Electric

### Part Numbers

KS82D, ULPK0041, 4132A008

### Application

Construction Machinery / Excavators

### Fuel Compatibility

Diesel
