

Electric Diesel Fuel Pump for Engine Cold Start

This electric diesel pump is designed to solve cold start problems in diesel engines and extend motor service life. It provides precise fuel delivery, ensuring optimal engine performance.

Overview

High-Performance Electric Diesel Pump

This electric diesel fuel pump is engineered for reliable engine cold starting and consistent fuel delivery. Designed for integration into large generator sets, marine engines, and emergency power systems, it ensures optimal fuel pressure for heavy-duty diesel applications. Its robust construction supports demanding operational environments, providing a dependable solution for critical machinery.

Technical Specifications

Compatible Models

- Yuchai compatible systems
- Fukang 50136 compatible systems

Compatible Applications

Large Generator Sets, Marine Engines, Emergency Power Systems, Heavy-Duty Diesel Engines

Operation

Electric

Primary Function

Fuel boosting and cold start assistance
