

Electric Diesel Fuel Pump for Engines

This electric diesel pump is designed to provide a long service life in diesel applications, with up to 10000 hours of operation. It solves cold start problems in winter for diesel engines and eliminates the need for manual exhaust.

Product Overview

High-Performance Diesel Fuel Delivery

This electric diesel fuel pump is engineered to ensure consistent and reliable fuel delivery for heavy-duty freight vehicles. It features an integrated fuel filtration system designed to effectively purify fuel, promoting cleaner engine operation and longevity. Built with a robust housing, this unit is constructed to withstand the demanding conditions of commercial engine applications.

Technical Details

Key Features

- Integrated fuel filter
- Electric operation
- Robust, durable housing
- Fuel purification system

Part Number	1000700909
Factory Code	2164
Application	Freight Vehicles, Diesel Engines
