

# Electric Diesel Fuel Pump for Vehicles

Electric diesel pump designed to solve issues of motor service life in diesel engines. It provides a solution to cold start problems in winter by eliminating manual exhaust.

## Product Overview

### High-Performance Diesel Fuel Delivery

This electric diesel fuel pump is engineered specifically for reliable fuel delivery in freight vehicles. Featuring a robust construction, it includes a durable black plastic housing with integrated mounting flanges for secure installation. The design incorporates a cylindrical filter section with vertical slots and high-quality red O-ring seals to ensure leak-free, consistent performance in demanding automotive environments.

## Technical Specifications

### Key Design Features

- Integrated mounting flanges
- Cylindrical filter section
- Vertical slot filtration
- Red O-ring seals

Compatible Fuel	Diesel
Housing Materials	Black Plastic, Metallic Silver

## Application

### Suitable Vehicles

Freight Vehicles • Automotive
