

Electric Drip Coffee Maker

This electric drip coffee maker is designed for brewing coffee using the drip method. It features a transparent water reservoir with level markings for easy filling and a glass carafe.

Product Overview

Efficient Brewing for Professional Environments

This electric drip coffee maker is designed for high-capacity brewing, delivering 10 to 12 cups per cycle with a 1.2L water reservoir. It features a sleek design with stainless steel accents and a transparent filter housing that allows for visual monitoring of the brewing process. Equipped with a non-stick keep-warm plate and an anti-drip device, it ensures a clean and convenient coffee service for any office or commercial setting.
